## Clinicians Talking About Patient Scores

### DISCUSSION

Have you ever encountered this in your personal or professional life?

How would you have responded in this scenario?

Would your response be different if the patient were using a nickname instead?

What are some inclusive strategies for using chosen names when they don't match with legal documentation?

### Some thoughts:

- A. Ask about chosen names
- B. Addressing people by chosen names and pronouns shows respect for them and helps provide better patient care
